

# LILLARD CLARK

Construction Company, Inc.

June 26, 2012

To whom it may concern:

Lillard & Clark has known and worked with Eckstine Electric for more than 25 years. In this time, L&C utilized them on projects ranging from a few thousand dollars to almost six million dollars. Our experience with EEC has been excellent and numerous times we have been able to count on them to provide value engineering cost input, meet tight deadlines, and provide technical expertise on specialty products. Their staff is courteous and is non-confrontational with their approach to projects and customer service.

L&C specifically selected Eckstine Electric to be a design build partner for a \$40 million dollar upgrade to Westminster's Big Dry Creek Wastewater Plant. Their preconstruction and value engineering services provided cost savings of more than \$500,000. During the project we were impressed with their submittals, project management, and ability to provide owner and engineer satisfaction.

I am more than happy to recommend Eckstine's services to any Owner or General Contractor and if there are further questions or input needed, please feel free to contact me at 303-761-3170.

Sincerely,

Paul Wagner
